

Romania/1/en

Law No. 150/2004 (with amendments) is the legal foundation for food and feed legislation in Romania. Infringement of food and feed regulations can lead to measures under criminal law and consumer damage claims under civil law, whereby the final decision rests with the courts. Government measures with regard to food safety are often based on scientific risk assessments. In Romania there is no institutional separation of risk assessment and risk management. Not all risk assessments are published on the Internet.
