

Romania/4/en

The Ministry of Agriculture and Rural Development (MADR) deals with agricultural policy and food safety in Romania. It prepares draft legislation in the area of food and feed of non-animal origin, residues of plant protection products and cultivation of genetically modified organisms (GMOs). MADR also conducts risk assessments in these fields. Activities of MADR with regard to plant protection products are supported by the National Environmental Protection Agency and the Ministry of Health. Two National Reference Laboratories are part of MADR pursuant to Regulation (EC) No. 625/2017.
