

Spain:Spain/14/en

The scope of MAPA's competencies also covers national decisions on GMOs, through the Interministerial Council on GMOs, on zoonoses as well as on the distribution, prescription, dispensing and use of veterinary medical products. It is also the regulatory authority for pesticides (registration, authorisation and monitoring of use). However, before MAPA authorises the use of pesticides, AESAN OA is consulted with regard to residues in foods, the Ministry of Health is consulted to assess the safety of the user, and MAPA assesses the efficacy of the pesticide in question and its safety for the environment.
